

## Phase 6: User Acceptance Testing (UAT)

**Step 1:** Login with a non-Admin user license in your dev org (use a standard profile).

**Step 2:** Navigate to the Leave Tracker app via the App Launcher.

**Step 3:** Submit New Leave Request

- Click Submit Request.
- Fill From Date, To Date, Reason.
- Click Submit.
- Confirm the form resets and the new request appears in the data table.

The screenshot shows the Salesforce interface with the 'Leave Request' app. The 'Edit LR-0005' form is open, displaying the following fields:

- Auto Number: LR-0005
- Owner: SHAIK BAJI
- \*From Date: 9/29/2025
- \*To Date: 9/30/2025
- Reason: Going outside for eating food. (highlighted with a red circle and '1')
- Status: Pending
- User: (Search People...)
- Manager Comment: (Text area)

The form is titled 'Edit LR-0005' and includes a 'Cancel' button, a 'Save & New' button, and a 'Save' button. A red circle with the number '1' highlights the 'Reason' field.

**Step 4:** Edit Request

**Step 5:** Click the Edit icon on the table row.

**Step 6:** Change a field and click Save.
