**Phase 5: Lightning App and Page Setup**

Objective: Create a Lightning App and App Page to host the LWC components.

• Tasks:

o Navigated to Setup > App Manager and created a new Lightning App named "Leave Tracker App."

o Selected the System Administrator profile for access and skipped optional settings.

o In Lightning App Builder, created a new App Page named "Leave Tracker" with a single-column layout.

o Dragged the leaveTracker component onto the page, saved, and activated it.

o Added the page to the "Leave Tracker App" as a tab.

o Verified the app in the App Launcher, ensuring the leaveTracker component displayed correctly.
